Magento 2 Plugin version six

2020.4

Flexigroup
Roger.bi@flexigroup.com.au
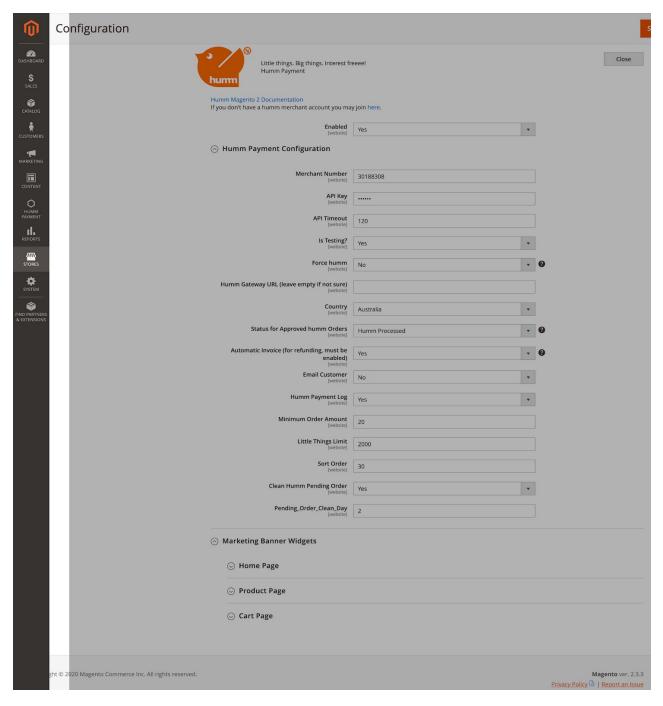

Overview

*The Magento2 plugin version 6 adds Coupon Codes functions and it is based on the Version5*
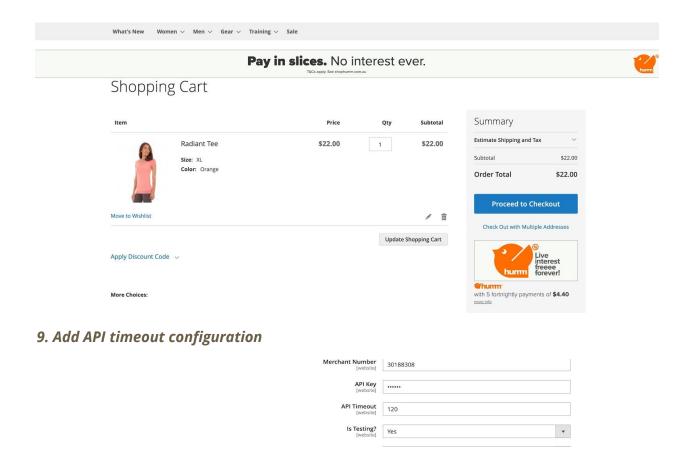

Goals and Functions

1. New configuration admin and UI
2. System Configurations easily are set up in the admin console then they work well in storefront end
3. Six banners and widgets are shown automatically in different pages, so first plugin with automation to the best integration performance
4. Banners and widgets can be customised with specific clients' requirements
5. Add a few pages for better UI to clients
6. Add a Server to Server Callback Post function
7. A separated payment Log file
8. Rewrite functions to validate call back
9. Unit test sections
10. Coupon Code functions
11. Dynamic Security Code functions for Validating payment
12. Advanced log for troubleshooting
13.UI improvements
14. Improvements in the legend code base
15. Improvements in the Humm Orders status change in admin console

New Admin Console for configuration of payment credential, Widgets, API timeout etc

9. Add API timeout configuration

API timeout configuration in the admin console and inject in the API call

Default Value is 120 and max is 1440

```
$data = array(
    'X_transaction_timeout' ⇒
(intval($this->getGatewayConfig()->getConfigdata('humm_conf/api_timeout')) < 1440) ?
intval($this->getGatewayConfig()->getConfigdata('humm_conf/api_timeout')) : 1440,
);
```

**10. Add function to update status of redundancy pending orders of Humm to "cancelled" status based on control of the M2
crontab, the filter condition is easily configured in the admin console**

Minimum Order Amount [website]	20
Little Things Limit [website]	2000
Sort Order [website]	30
Clean Humm Pending Order [website]	Yes
Pending_Order_Clean_Day [website]	2

Clean Humm Pending Order is set to "Yes", then Plugin starts to clean humm pending orders between the time span setup below, otherwise, it doesn't work, default is set to "Yes"

*   Pending_Order_Clean_Day is the span of day(s) for plugin to clean pending orders*

The time span is from moment of time today subtracts to the value of this parameter

Please see detail in the module of Humm/HummPaymentGateway/Cron/UpdateHummOrder.php

11. When update the status of pend orders, rollback the stock of inventory etc

12. When cancel order by using cancel button in the host page of Humm payment, refund stock of inventory etc

13. Add a new crontab module for above 1 and 2, so please set time parameters in crontab.xml, currently id is "default"
*<group id="index">*
*   <job instance="Humm\HummPaymentGateway\Cron\UpdateHummOrder" method="execute" name="humm_hummpaymentgateway_cron">*

```
    <schedule>* * * * *</schedule>
  </job>
</group>
```

14. Add admin menu to show changing status history of all Humm orders for clarify
This function shows how order statuses get evolution from pending to process or cancelled in the payment process

15. Coupon Code functions (normal usage and rollback CouponCode)

Rollback coupon code in two user cases "cancel button in host page" and "used coupon code in the pender orders"

Humm/HummPaymentGateway/Model/Observer/CouponCode.php, there are two functions

Function execute for free used coupon code in the user case of clicking cancel button on the host payment page

Function ProcessCoupon for free used coupon code in the pending orders called by

Humm/HummPaymentGateway/Cron/UpdateHummOrder.php, which is controlled by Crontab

Questions and Answers

Where is the Log file in the server ?

The file is var/log/humm-payment.log

What log file serves for and how it looks like ?

Log file serves as a key to troubleshooting and error check

Turn on/off log file in the admin console

This is a whole transaction log from start to end, if payment failed in the function, please send log file to me for troubleshooting

What are the reasons for payment can not work on the redirect ?

1. *Merchant NO and API key should be right*
2. *Environment setup should be right*
3. *Country in the admin console should be setup right*
4. *The country of Shipping address should match countries setup in the admin console of Humm payment*
5. *Signature errors*
6. *Check log file*
